IMPORTANT QUESTIONS FOR GTU

Communication Skills in English(DI01000031)

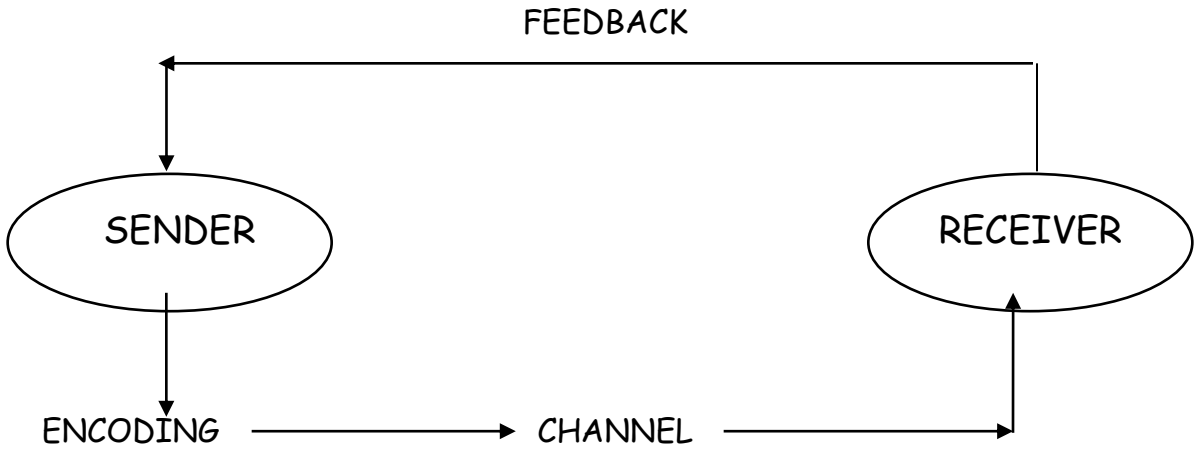

Unit-1

Q. Define Communication and discuss Theory / Model of Communication.

Ans.

It is very difficult to imagine the world without communication. Communication is as old as human civilization. No human society can exist without communicating with one another. Not only that, even animals and birds also feel the need to communicate. Human beings communicate in order to express themselves. Therefore, **'communication' means an exchange of thoughts, ideas, messages, feelings, information etc. from one person to the other.** For the purpose of communication, human beings use mainly two types methods: verbal language and non-verbal language. Verbal language includes use of words. For example, speaking and writing. Non verbal language includes use of signs, signals, symbols, body language, gestures etc.

Now, let's understand process or model of communication:

1. **Sender:** Sender is the person who sends the message. He is the person who starts communication process.

2. **Encoding:** Encoding is one of the most important parts of the process. Encoding means to give form or shape to a message. This encoding can be in the form of speech, writing, symbols, pictures etc. Encoding must be done very accurately so that it does not create any misunderstanding between the sender and the receiver.

The sender must use common language in this process. He should use the words which are easy to understand. Moreover, he should also take care of age, educational background of his audience. In this way, success of communication depends much on encoding.

3. **Channel:** Channel is the medium through which message passes from the Sender to the Receiver. For example, in case of face to face communication, air is the channel or medium.

4. **Decoding & Receiver:** Receiver is the person who receives and then tries to decode the message sent by the Sender. Decoding is the process of understanding and interpreting the message. The receiver must be ready and attentive to receive and understand the message.

5. **Feedback:** Though Feedback is the last part of the Process of Communication, it as important as other parts. Feedback informs the Sender whether (i) his message has reached the Receiver and (ii) the Receiver has understood the message accurately. If there is no Feedback in the process of communication, the Sender is without any clues. Moreover, Feedback also gives the Sender an opportunity to modify or change his encoding process so that he can communicate with the Receiver successfully. On the other side, it is also the duty of the Receiver to send his Feedback as soon as he receives the message.

Q. What is communication? Explain the types of communication.

Ans.

There are mainly two types of Communications:

(a) Verbal Communication and (b) Non-verbal Communication

(a) <u>Verbal Communication</u>: This type of communication involves the use of language and words. Therefore, Verbal Communication can be divided into Written Communication and Oral Communication.

Written Communication: All the written forms such as emails, letters, reports, SMS, books, newspapers, posters etc. are the examples of Written Communication. Verbal communication is easy to understand if we know the words and language.

Advantages of Written Communication

(a) Suitable for lengthy communication
(b) More clarity of message
(c) It serves as a proof in case of disputes

Disadvantages of Written Communication

(a) Difficult to understand by uneducated people
(b) More time consuming
(c) Feedback is slow

Oral Communication: In oral communication, Spoken words are used. It includes face-to-face conversations, speech, telephonic conversation, video, radio, television, voice over internet. Communication is affected by volume, speed and clarity of speaking.

(b) Non-verbal Communication:

In this type of communication, messages are sent without the use of spoken or written words. This type of communication includes facial expressions, gestures, body language, eye contact, postures etc. It is important to note that non-verbal communication forms more than 70% of the total human communication. Non-verbal communication is the most powerful form of communication. Therefore, it is very important to know how to use it correctly. There are many forms and tips for learning and improving personal non-verbal skills.

Posture is the position in which we hold our body while standing, sitting or lying down. Our body posture conveys information about our personality such as confidence, openness, lack of interest etc.

Facial expressions play a major role in face to face communication. A person who has good expressions can communicate better. Facial expressions also play an important role in giving feedback to the Speaker.

Body language helps us in understanding and decoding what the person is saying. Body language also helps us to interpret other peoples' moods and emotions. Apart from this, it increases our understanding of people's reactions to what we say and how we say it.

Q. Barriers to communication.

Communication is one of our basic needs. We need to communicate with many people for personal and professional reasons. During this process, we may face many hurdles or problems. Sometimes the message does not pass properly or it gets lost. Sometimes, there is miscommunication between the sender and the receiver. Because of this, there is communication failure.

Definition of a barrier: 'Any obstacle which makes Communication slow or ineffective is called a barrier.'

Let's study various types of barriers in detail.

1. Language/Semantic/Linguistic Barriers:

Barriers created due to language are called language / semantic or linguistic barriers. When the Sender and the Receiver do not use a common language, there is a problem in communication. Moreover, there are a number of words which have multiple meanings. Words like 'patient', 'room', 'light', 'bench' etc. have more than one meaning. This can create barrier in communication. Some words which have similar pronunciation but different meanings. E.g. Except-accept, fair-fare, principal-principle etc.

2. Physical Barriers / Mechanical Barriers

The barriers which are created by noise, distance, physical disability are called Physical barriers. For example, Traffic Noise or noise of machines. This can create disturbance in face to face communication. Sometimes, the instruments used in communication

such as telephones, cell phones, or computer may not work properly. This can create barrier in communication.

3. Interpersonal Barrier

Interpersonal barriers are very common in the workplace. When employees are afraid to talk freely to their seniors, it creates problems in communication. Lack of trust among team members is also an example of interpersonal barrier.

4. Psychological Barrier

Psychological barriers are related to mind. Stress, fear, inferiority complex, stage fear etc. are psychological barriers. Age, status, education, experiences, personal likes or dislikes, ego, etc. are responsible for this barrier.

5. Organizational Barrier

Organizational barrier is a workplace related barrier. It happens when there is loss of information among the people in an organization. This can result into miscommunication.

6. Socio-Cultural Barriers

Cultural differences between people can create this barrier. Difference in cultural, religions, clothes, language and food habits are responsible for these barriers. This barrier can be avoided by making people aware of cultural diversity.

Unit-3

After Twenty years
1. Describe the appearance of the policeman on the street.
Ans. The policeman was walking up the street in a very impressive
manner. He was very alert and was carrying a club / stick. He was looking
like a ‘guardian of peace.’
2. How was the weather that night?

Or
Why was the street depeopled?
Ans. The weather was very cold that night. Chilly gusts of wind was
blowing. Most of the offices were closed. So, the street was depeopled.
3. What did the stranger say to the policeman?
Ans. The stranger standing near the hardware store told the policeman
that he was waiting for his friend. He also told him about an appointment
made twenty years ago.
4. What used to be there in the place of that shop twenty years ago?
Ans. There used to be **a** restaurant, Big Joe' Brady's, in the place of that
hardware shop twenty years ago.
5. Describe the man awaiting the arrival of his friend.
or
Describe the appearance of Bob.
Ans. Bob had a pale, square-jawed face with keen eyes. There was a
little white scar near his right eyebrow. His scarf pin was a large diamond.
Stopping by woods
Q-1 Who is the speaker? Where is he in the poem?
Ans. The speaker is the poet himself. He is passing through the
woods.
Q-2 Why do you think the poet stopped in the woods?
Ans. In the first stanza, the poet is travelling on a horse. On his
way, he stops in the woods to watch them "fill up with snow." He
stops there to enjoy the beauty of nature.

Q-3 What is woods?

Ans. The meaning of woods in this poem is a small forest or a thick growth of trees.

Q-4 Describe the woods the poet is in.

Ans. The woods are 'lovely, dark and deep.' The poet is attracted by the beauty and silence of woods on a snowy evening.

Q-5 Who is the owner of the woods and why will he not be able to see the poet?

Ans. The owner lives in the village, away from the woods so he will not be able to see the poet stopping in the forest.

Leopard

Q-1 Why did the author visit the ravines?

Ans. The author is a great lover of nature. He often visits the ravine to get a feel of the nature and wild life. He never intended to harm the nature.

Q-2 Make a list of the wildlife the author sees in the woods.

Ans. The author encounters a variety of flora and fauna in the woods. During his visit to the woods, he comes across oak and maple trees. He also sees many flowering plants Himalayan rhododendron, raspberries, bamboo, primroses, etc. Moreover, he also sees pheasant, forktails, langurs, barking deer, red fox and also a leopard.

Q-3 Make a list of plants the author encounters in the forest.

Ans. The author encounters a variety of flora and fauna in the woods. During his visit to the woods, he comes across oak and maple trees. He also sees many flowering plants Himalayan rhododendron, raspberries,

bamboo, primroses etc.
Q-4 How did the author recognize the forktail?
Ans. The author recognized the forktail by the white ‘Cross of St Andrew’
on its back.
Q-5 What was the danger the langurs were trying the author to warn
against?
Or
“The langurs were trying to warn me of some hidden danger.” How
did the langurs behave? What was the hidden danger?
Ans. The langurs were making loud chattering sound in the trees. Their
behaviour was strange. They were trying to warn the author against the
leopard.
6. “The birds and animals knew their trust had been violated.” What
does this mean in the story?
Ans. The forest is the home of the wild animals and birds. When the
hunters started killing animals and birds, it destroyed the peace of their
home and the trust which they put on human beings.
