Dr. Jivraj N. Mehta Government Polytechnic, Amreli
ICT Department

Course: Fundamental of Electronics **Course Code: DI01000051**

ASSIGNMENT- 1

Unit – 1: Electronic Components

CO: DI01000051.1. Use passive electronic components and it's measurement.

Sr. No	Question
1	Define Active and Passive Components with example
2	Define Resister. Draw its Symbol and Give Its Classification.
3	Explain the color band coding method of Resistor. Write color band of 32 Ω ±10% resistance.
4	Write color band of following resistance. (1) 47 Ω±5% (2) 05 Ω±10%
5	Calculate value of resistor and tolerance for following color bands on resistor: (1) Brown, Green, yellow, gold (2) Grey, blue, brown
6	Explain Light dependent resistor (LDR).
7	Explain concept of capacitors.
8	Give Classification of Capacitors.
9	Define Capacitance and explain Aluminum Electrolytic wet type capacitor.
10	State Faraday's laws of electromagnetic induction
11	Explain self and mutual inductance in brief.
12	Give Classification of Inductor in detail
